THE COCOANUT EBOOKS 2019

Author: Scrugham Lyon

Realese Date: Expected @@expectedReleaseDate@@

This is a Book of Agriculture. The book says that Until very recent years the demand for the "meat" of the cocoanut or its products was limited to the uses of soap boilers and confectioners. Probably there is no other plant in the vegetable kingdom which serves so many and so varied purposes in the domestic economy of the peoples in whose countries it grows. Within the past decade chemical science has produced from the cocoanut a series of food products whose manufacture has revolutionized industry and placed the business of the manufacturer and of the producer upon a plane of prosperity never before enjoyed. There has also been a great advance in the processes by which the new oil derivatives are manufactured. The United States took the initiative with the first recorded commercial factories in 1895. In 1897 the Germans established factories in Mannheim, but it remained for the French people to bring the industry to its present perfection. According to the latest reports of the American consul at Marseilles, the conversion of cocoanut oil into dietetic compounds was undertaken in that city in 1900, by Messrs. Rocca, Tassy and de Roux, who in that year turned out an average of 25 tons per month. During the year just closed (1902) their average monthly output exceeded 6, 000 tons and, in addition to this, four or five other large factories were all working together to meet the world's demand for "vegetaline", "cocoaline", or other products with suggestive names, belonging to this infant industry.
